

Giggles & Grins Health Policy

Each child is a treasure from God and I will strive to keep a safe and healthy place for all children! I ask that you keep your child with you until he/she has been 24 hours without any of the following symptoms:

- diarrhea, vomiting
- fever of 100° F or greater (without using Tylenol or Motrin to control fever)
- any skin infection or open sores
- any undiagnosed rash or head lice
- severe or persistent cough
- pink eye (unless there is no discharge & drops have been used for 24 hours)
- sore throat
- excessive nasal discharge
- common cold or other viruses

If a child develops any of the above symptoms while they are in preschool, the parent will be notified immediately. With antibiotic treatment, your child should be on the medication for at least 24 hours before returning to school. Please be aware that I will not be responsible for administering any prescription medication during school hours. I am trained in general First Aid, CPR & Standard Precautions. Parents will be notified if any First Aid is administered during school hours. Please be sure to notify me if your child has any diagnosed rashes, sensitive skin or is recovering from an injury or illness.

We will practice good hand washing skills and Norwex products will be used to clean our room and toys, and any other will be an all natural disinfectant. If you have any questions, please feel free to contact me!!

Thank you for doing your part in keeping our preschool healthy & safe!
